Research Data Management?

UCL Research Data Management Policy

► Members can fulfil the requirements of good research practice by enabling them to manage research data in a manner that maximises data impact and acknowledges data value as a primary research output...

► Responsibility for managing and preserving research data is shared between all members of the college.

► ...following primary use (e.g. publication)...data be made available in the most open manner appropriate.

Why Bother?

You have to do it

- Mandatory
- Part of research process

Funding

- Compliance
- Applying

Open Science – why share research data?

- More citations
- Reproducible
- Reuse

Support available

- Advice on research funder policies and reviewing of Research Data Management Plans
- Research data storage
- Training and guides
